Inflated lumber prices, devastating supply chain shortages, and the rise in automation, the past few years have been unprecedented for the construction and manufacturing industry. Yet EVERWIN was listening to the voices of our users, and we had already taken action.

The newly released PCN70CL revolutionizes wooden pallet repairs by reusing lumber, the new FSN3400LM framing nailer is customized to fit industrial production lines, and the EVERWIN warehouse increased tool stock to up to 5,000 piece to combat supply chain disruptions.

Interview with Andy Chuang, Manager of Marketing and Sales at EVERWIN PNEUMATICS and Contractor Supply Magazine.

The new FSN3400LM framing nailer is a patented ClinchNail™ air clamp nailer designed to clamp nails into place, resulting in an optimal clinch-to-plate rate.

condense nailers that fully address the needs of today's remodelers. Our new cordless nailers are closer to their pneumatic counterparts in size and weight, are faster and shoot more nails per charge.

Melroe HPT's new MultiVolt cordless tools and technologies deliver a complete cordless solution to professional remodelers, including 36V and 18V options — all capable of operating off the 18V/36V MultiVolt batteries.

Melroe HPT 18V cordless tools deliver all the performance that a pro needs for his average job and the versatility to "Go Longer" with MultiVolt batteries. Tools like the NR3900DR and NR3600DC 36V cordless framing nailers can drive three nails per second and up to 300 nails per charge.

EVERWIN PNEUMATIC
In trying times, Everwin has contributed to user demands on three fronts: saving on timber usage, simplifying automated production and optimizing supply chain management. While lumber costs hit a record peak last year, today the price remains nearly three times higher than the average pre-pandemic price. It is uncertain when lumber

prices will decline, but one result is a tendency in the market to reuse wooden pallets. Pallets that might be scrapped are instead being repaired and put back into service.

"At Everwin, we have always found a niche in satisfying the needs of the most demanding individuals with the latest equipment and specific applications," says Andy Chuang, manager of marketing and sales. "One of these solutions was the PN70CL Industrial Clinch Nail Gun, which really revolutionizes the way pallets are repaired."

The PN70CL nailer is powered with a built-in air, which results in nails clinched as intended in pallet repair. Everwin's patented ClinchNail™ air route ensures the nail clamps pallets springs firmly below each nail's driver, resulting in an optimal clinch-to-plate rate. The traditional method of driving nails through a pallet, then hammering the protruding tip with an actual hammer is time-consuming, dangerous and inefficient.

"We continue to establish ourselves in industrial automation solutions," continues Charles Lin, director of sales. "Everwin provides

the option to upgrade our existing product line with automation and the FSN3400LM framing nailer is an example of our continued investment in automation solutions. When working with automation, users can customize our pneumatic tools to fit industrial production lines."

Amid global supply chain disruptions, Everwin increased its facility tool stock to 5,000-5,000 pieces to satisfy order demands.

OMER USA
Increased automation created during the recent COVID-19 lockdown and it coincided with a skilled worker shortage that is now the post-pandemic reality. Good wages aren't enough to entice talented people into the woodworking trades these days.

About EVERWIN PNEUMATIC

EVERWIN® was founded in 2012 by a group of American and Taiwanese pneumatic tool experts, each boasting decades of experience and success in the world of pneumatic fastening. They founded the company with one shared goal in mind— to “build a brand the fastening industry can rely on for consistency and efficiency”. EVERWIN quickly garnered recognition as a premier brand for industrial fastening tools. With strong roots in the industrial market, EVERWIN has a different take on construction nailers and staplers from most price-driven manufacturers today; and with a touch of innovation, its 2017 and 2018 product introductions earned EVERWIN back-to-back Pro Tool Innovation Awards.
