AND YOU'RE DONE

## CHANGING THE FACE OF DECKING

- VERSATILE** · works with any solid or grooved treated lumber, hardwood, pine, composite or PVC deckboards
- EASY** · no pre-drilling required - automatic spacing SECURE attached deckboards directly to the joist - reduces board movement
- AESTHETIC** · smooth and fastener-free surface

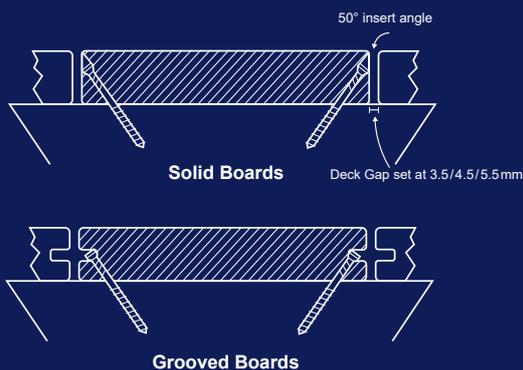

## WHAT IS HIDDEN DECK FASTENING?

Designed to create a fastener-free deck surface, TIMBERTEK HDJ Jigs are used to install a multitude of different deck products including:

Wood deck board products including softwoods such as pressure treated lumber, cedar, redwood and other similar products and hardwoods including Ipe, Kebony®, Tigerwood®, Ironwood®, Cumaru® and other similar products.

Wood alternative deck board products (solid and grooved) such as composite, capped composite, and PVC decking products including those manufactured by Trex®, Fiberon®, AERT®, CPG Building Products® (Timbertech® and AZEK® brands), TAMKO®, Wolf® and other similar products.

## HOW IT WORKS AND WHY IT IS STRONGER THAN FACE FASTENING?

With Edge Fastening, the uplift is on the ENTIRE screw

With Face Fastening, the uplift is on the HEAD of the screw

Trim head decking screws up to 5.15mm in head dia.

**M4.8 x 50 mm:**  
board thickness 19 ~ 25 mm

**M4.8 x 60 mm:**  
board thickness 25 ~ 32 mm

**M4.8 x 75 mm:**  
board thickness 32 ~ 38 mm
